

Population Name	NC London and North Hertfordshire
Population Size	1.6 million
Report for 12 months ending	July 2013
Number of practices in the population	213
Participating practices - number (%)	Hub and Spoke 33 (15%)
Total number of patients from participating practices	~ 2100
Patients diagnosed with AF in participating practices – number and % of total patients	Approx 75 - 85%
% of patients risk assessed using CHADS2	Approx 75 - 80%
Number and % of patients with:	CHADS2 score of 0: Available 2014 CHADS2 score of 1: Available 2014 CHADS2 score of >1: Available 2014
% of patients with C2 score of >2 on an Oral Anticoagulant (OAC)	?
% of patients with C2 scores of >2 on Aspirin	?
NEQAS data	Participation in NEQAS (yes or no): YES % of results within consensus: 95% Mean % deviation:
Mean clinic TTR (Time-in-Therapeutic-Range)	64
% of patients with a TTR of >65%	Approx 60%
Number of adverse events (thrombosis or bleeding)	Very few
Number of critical INRs (<1.5; >5.0; >8)	<1.2 = 0.3%; >8 = 0.01%
Estimate of number of strokes prevented in high risk patients	??
Estimate of cost savings	??
ADDITIONAL INFO: number of patients with stroke being admitted to the stroke units	in 2007-2007 1,736 (ICD 10 160-164)
ADDITIONAL INFO: number of self-testing patients	Approx 50
ADDITIONAL INFO: number of self-managing patients	Approx 10
ADDITIONAL INFO: % of AF patients given basic information	100%
ADDITIONAL INFO: number of GP awareness sessions about anticoagulation and AF	Many
